PERSONAL SUMMARY

Web/Full Stack Developer with 2 years of experience in web development, proficient in both frontend and backend technologies with expertise in API integration. Seeking opportunities to leverage my skills in frontend and backend development to contribute to impactful projects and drive growth for the organization.

EXPERIENCE

Software Developer, 03/2024 - Current
Mystro - Navi Mumbai, IN

- Developed a loan-based web portal to manage lender and borrower data, utilizing Python Flask for backend integration, and MySQL for secure data storage and retrieval.
- Implemented dynamic data handling on the frontend using JavaScript, JS DataTables, and Bootstrap, ensuring a responsive and user-friendly interface.
- Designed secure authentication and authorization mechanisms, safeguarding sensitive user data, and restricting access based on roles.
- Streamlined data workflows by creating multiple forms to save and update information in the MySQL database, and fetch data dynamically for frontend display.
- Collaborating on an e-commerce project, leveraging full-stack technologies to design and develop scalable features for product management and customer engagement.

Freelancer, 03/2023 - 02/2024
SSP Technology - Navi Mumbai, IN

- **Developed a Car Rental ERP System** using ReactJS, featuring vehicle categorization, filtering by availability, price, and fuel type, and dynamic forms for user registration, booking, and feedback.
- Integrated a backend with a database using APIs and React Router for seamless frontend navigation and intuitive page transitions.

Freelancer Front End Developer, 10/2022 - 02/2023
awesomeunt.org - Navi Mumbai, IN

- Executed a complete overhaul of awesomehunt.org's interface utilizing HTML, CSS, and the Bulma framework. Contributed the development of a website that aggregates content, including books, courses, blogs, podcasts, and resources on various topics.

Proposal Engineer, 09/2013 - 01/2023
Multiple companies - Navi Mumbai, Pune, IN

- Designed, estimated, and proposed water and wastewater treatment plants.
- Selected materials and equipment, and conducted technical discussions with vendors.
